United States Foreign Trade

SUMMARY REPORT
FT 950-I

July 1963

FOR RELEASE
September 11, 1963

IMPORT TRADE BY COUNTRY

The Bureau of the Census, Department of Commerce, announced today that the increase in United States general imports, unadjusted for seasonal variation, from \$1,356.5 million in June to \$1,504.6 million in July¹, reflected increases in imports from all areas except Canada. Changes in the dollar values of area totals from June to July were as follows: Western Europe, from \$356.0 to \$433.6 million; Latin American Republics, from \$258.6 to \$274.3 million; Canada, from \$341.9 to \$338.0 million; and "all other countries", from \$400.0 to \$458.7 million.

From June to July, there were increases in imports from O.E.C.D. countries in Europe, and sterling area countries, from \$347.5 to 424.3 million, and from \$249.2 to \$287.6 million, respectively. Increases were reported in imports from all continents except North America.

The rise in imports from Europe, from \$362.4 million in June to \$442.1 million in July, was largely accounted for by increases in imports from individual countries of this continent as follows: United Kingdom, from \$83.3 to \$100.9 million; West Germany, from \$75.1 to \$92.3 million; Belgium

¹On a seasonally-adjusted basis, total general imports were valued at \$1,469.2 million in July. (See the July 1963 issue of Report No. FT 900-I.) Seasonally-adjusted data are not available by country of origin.

and Luxembourg, from \$26.5 to \$38.4 million; Italy, from \$38.2 to \$47.0 million; and France from \$36.2 to \$44.9 million. Imports from Asia increased from \$252.5 to \$283.3 million owing chiefly to a rise in imports from Japan, from \$109.6 to \$143.3 million. The increase in imports from South America, from \$174.3 to \$196.9 million, reflected higher levels of imports from Colombia, from \$12.7 to \$20.7 million; Brazil, from \$36.3 to \$43.0 million; and Argentina, from \$8.8 to \$14.5 million.

Imports from Australia and Oceania rose from \$37.1 to \$53.2 million primarily due to an increase in imports from New Zealand and Western Samoa, from \$12.5 to \$25.1 million. The increase in imports from Africa, from \$54.8 to \$61.4 million, was primarily due to an increase in imports from the Republic of South Africa, from \$16.8 to \$23.3 million.

During the period, imports from North America declined from \$475.1 to \$467.7 million. This change was mainly due to decreases in imports from Mexico, from \$46.6 to \$39.4 million; Dominican Republic, from \$22.5 to \$18.3 million; Canada, from \$341.9 to \$338.0 million; and Jamaica, from \$13.5 to \$10.0 million. However, these decreases were largely offset by increases in imports from Netherlands Antilles, from \$17.7 to \$23.6 million; and El Salvador, from \$0.5 to \$5.5 million.

EXPLANATION OF STATISTICS

COVERAGE: Import statistics include merchandise imported by government agencies as well as by private importers, but exclude American goods returned by the United States armed forces for their own use. United States trade with Puerto Rico and United States possessions is not included in this report but the import trade of Puerto Rico with foreign countries is included as a part of the United States import trade. Merchandise shipped in transit through the United States between foreign countries is not included in import statistics. However, the statistics may include some merchandise (principally duty free) which is entered through United States Customs and subsequently exported in the same condition in which imported. In many cases, such merchandise differs from in transit merchandise only in the manner in which it is documented.

COUNTRY DEFINITION: Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, lading, or the country in which mixed lots of various origin are consolidated. It follows, therefore, that imports from such merchandising or transshipment countries are likely to be overstated and imports from other countries correspondingly understated.

VALUATION: Import values are, in general, based on market price or selling price, and are, in general, f.o.b. the exporting country. They exclude

United States import duties. None of the values have been adjusted for changes in price level.

RELIABILITY: The statistics presented in this report are based partly on sample data (i.e. formal entries valued under \$100 and all informal entries valued under \$250), and therefore are subject to sampling variation that may cause them to differ somewhat from the results which would have been obtained from processing all import entries. The probable variability due to sampling is either less than \$50,000 (the largest variation from rounding of figures) or less than 1 percent of the individual totals shown.

In addition to the effects of sampling variation, and the difficulties described above under COUNTRY DEFINITION, monthly import statistics are subject to some error from such sources as the carry-over of data from month to month in the compiling process and errors in reporting or processing. Although the effect of such errors on the rounded totals in this report is probably small, the possibility of inaccuracy should be taken into account, particularly in using figures of relatively small magnitude.

Further information regarding coverage, valuation, compilation procedures and precision of import data is contained in the foreword of Reports No. FT 110 and FT 120. For complete statement, see foreword in Foreign Commerce and Navigation of the United States.

UNITED STATES GENERAL IMPORTS, BY COUNTRY OF ORIGIN: JULY 1963 AND SELECTED PERIODS

(In millions of dollars. N.e.c. indicates not elsewhere classified. General imports are a total of imports for immediate consumption plus entries into bonded warehouses. Data revised to reflect all corrections published with the statistics through those for December 1962. Totals represent sum of unrounded figures, hence may vary slightly from sum of rounded amounts.)

^aLatin American Republics. ^bSterling area countries. ^cWestern Europe. ^dO.E.C.D. (Organization for Economic Co-operation and Development) countries in Europe. *Indicates less than \$50,000. ¹For definitions of countries as used in this report, refer to current edition of Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics.

²The 1962 monthly average figures shown exclude February 1962 data on \$1-\$99 formal and \$1-\$250 informal entry shipments which are estimated as totaling about \$9.7 million. Data on these shipments are also excluded from the individual area, continent, and country totals shown in this report and from the data in FT 930-1, FT 110, FT 120, IM 145, etc. ³Effective with the statistics for July 1962, the country designation "Portuguese Asia, N.E.C.", comprising Goo, Domo, Diu and Portuguese Timor become obsolete. Beginning with the September 1962 issue of this report, data for Goo, Domo, and Diu are shown separately while data for Portuguese Timor are included, along with data for other countries, in the figures for "Southern and Southeastern Asia, N.E.C."

⁴Countries which could not be identified.
